LET’S GET GIRLS BACK TO SCHOOL

1 in 5 girls in India drop out of school upon reaching puberty

46% of girls do not attend secondary school

42% women aged 15-24 do not have access to menstrual hygiene products

Half of Indian women (aged 30-34) marry before the age of 18

One in five women give birth before their 18th birthday

DID YOU KNOW?

This can lead to

- End of their education and exposure to the outer world
- Early and repeated pregnancies
- Lack of empowerment
- Reduced livelihood opportunities
- Increased susceptibility to domestic abuse, violence and virtually every social evil that afflicts girls and women
We seek your help in raising awareness and resources for our mission through the Tata Mumbai Marathon, 2020.

Your support will help FPA India:

- **ENHANCE**: Access to sanitary napkins and adolescent-friendly health services
- **EMPOWER**: Girls with life skills education and livelihood opportunities
- **ENABLE**: Communities to create a safe environment for girls
- **EDUCATE**: Parents to reduce gender discrimination

Not one girl has to miss a single day of school simply because she is becoming a woman.

Women and girls live healthy and dignified lives and complete their education without dropping out.

Age at marriage and child-bearing are delayed.

We envision a day where...

Women and girls live healthy and dignified lives and complete their education without dropping out. Not one girl has to miss a single day of school simply because she is becoming a woman. Age at marriage and child-bearing are delayed.

Education, empowering girls with life skills, and providing safe environments for girls are key to achieving this vision. Your support will help FPA India realize this goal.
A year’s supply of sanitary napkins
